EXPERIENCE

Jr. iOS Developer • EndPrizeSolutions   *Mar 2024 - Present | Remote*
- Created reusable components in both SwiftUI and UIKit.
- Delivered a production-level feature for a live AppStore application.
- Migrated 10+ screens from UIKit to SwiftUI, improving maintainability.
- Worked independently with minimal revisions (minor corrections, clarifications).

QA Engineer • Skywind Group   *Dec 2022 - Nov 2023 | Hybrid*
- Conducted cross-platform testing for cryptocurrency projects, including API, integration, and end-to-end tests.
- Collaborated with development teams and ensured thorough process adherence and issue tracking.

Senior QA Tester • Funcom   *Jan 2022 - Dec 2022 | Bucharest*
- Developed, maintained, reviewed and proposed improvements for existing processes.
- Supported the team lead through overview sessions, training programs, task allocation for both local and cross-regional team members.

PROJECTS

Shelfy • GitHub Link

A book-tracking app built with UIKit, integrating the OpenLibrary API. Includes a gamified level system based on pages read and book categorization.

Tech Stack: Swift, UIKit, CoreData, Firebase (Auth, Firestore), OpenLibrary API

moodly • GitHub Link

A privacy-focused journaling and mood-tracking app inspired by Year in Pixels. Built with SwiftUI and SwiftData, it stores all data locally, no login or cloud sync.

Tech Stack: Swift, SwiftUI, SwitData

ABOUT

Passionate Jr. iOS Developer with a strong foundation in Swift and SwiftUI, coming with a strong QA background (9+ years) I manage to combine a sharp eye for edge-cases with a product- oriented mindset.

COURSES

iOS & Swift - A Complete Bootcamp
2023 | Udemy

Hands-on experience with Swift, and SwiftUI using real-life projects.

Postman & API Testing
2023 | Udemy

Practical Postman API Testing and experience with Postman

Programatic Autolayout in Swift
2023 | Udemy

Experience in creating reusable components and programatic layouts in Swift

TECH STACK

Languages: Swift
iOS Development: SwiftUI, UIKit, SwiftData, CoreData
Backend & APIs: Firebase, SupaBase, REST APIs
Tools: Xcode, Git, GitHub, Bitbucket
Other: MVVM, Local data persistence
